# COPPER ACRES HAS PRINCE CON MAY

Several Shipments Saved From Holds Strong Under Bear At- Course Is Changed to Cut the Assessment Work—May But More Active.

Several carloads of shipping ore are Promise of Ploche issues stepping in to on the dumps of the Copper Acres give the Tintics a run for leadership on per cent to as high as 41 per cent copper, with fair values in silver and some gold.

Copper Acres is controlled by the Salt Lake interests that own Ninety-

Nine Copper. Engineer J. B. Jenson expects to leave Monday for Good Eprings to look after recent important velopments in the Ninety-Nine property, and upon the way home he will likely stop at Copper Acres to determine the feasibility of shipping the high-grade ore on hand and inaugurating a more active development cam-

The Ninety-Nine company has been pening a great body of shipping ore clow its 200-foot level. In sinking about twenty feet from the 200-foot level the ore body widened from four feet to more than fifteen feet, with only one wall in sight. A shipping osition there is already assured, and the indications are that it will develop into something considerably out of the ordinary. It is the intention to get under the ore body on the 250-foot livel as quickly as possible, that the product may be taken out economic- week, 350,002 shares of the market value

# MISSOURI IS ABOUT TO MAKE SHOWING

Company Which Succeeds the Montana Will Start Work in Meilich.

Arrangements are being made by offi-

als of the Missouri Mining company o at once resume development work in the Meilich group where it was left off by the Montana Mining company, acpording to advices from Tintic. They have absolute faith in the ground, and purpose making the new campaign as aggressive as circumstances will permit. The Montana company went out of business several months ago when its development fund was exhausted and the selling of treasury stock was out of the question. Some of the large interests favored assessing the stock to provide means to carry on the work, but for some reason action in that direction was never taken. The company's plant of machinery was sold at sheriff's sale to satisfy a judgment for deferred paymenis, and the group of claims, which

were held under bond, reverted to the original owners. The original owners are among the large interests in the Missouri Mining npany. John Roundy, who was presdent of the Montana, is president of the new concern. Other officials are: Joseph Meilich, vice president; M. W. Bird, secretary and treasurer; with A. B. Rockhill and John P. Creer additional directors. Roundy, who was for a number of years superintendent of the Knight properties, will have personal charge of development work, it is said.

# CARS OF RICH ORE START NEW MOVE

ack—Promises to Attract Interest.

mine, near Battle Mountain. Nev., the result of work only which has been intended as assessment work. The winze when Prince Consolidated jumped sudfrom the lower tunnel—which is about dealy from 72c to 33c a share. The price 100 feet from the surface—was sunk as at which Prince Consolidated has been deep as the work could be done by hand. Then a raise to the surface was sunk as quoted recently is so absurdly nominal, hand. Then a raise to the surface was started. Both of those workings follow sidered, that only a few orders for the five feet of high-grade ore, average stock were required to cause a marked samples taken having assayed from 16 advance. As one mining man expressed

advance. As one mining man expressed it, however, the stock is more attractive at 30c, when active, than it was at 70c, inactive, for there is a large margin for safety before the price will approach the value of the property.

With Prince Consolidated active, attention must be attracted to other Ploche issues, nearly all of which are backed by mines with unusual ore showings. The reopening of the Sait Lake Route for traffic, which will permit the Pioche mines to resume active operations, with several of them prepared to make handsome production records, should materially aid the new movement.

On the Saturday market Prince again sold at 33c, and under pressure of bears was forced backward only to 89c, displaying good strength under existing conditions.

UNLISTED STOCKS

Seven Troughs Coalition became the strong member of the unlisted issues. While it has not been particularly active on the board, it has been moving upward lately at the rate of ten cents a day. Yesterday's sale of 500 shares at 400 represents a gain of about 100 per cent in a very short time. Ely Centennial moved another point, with 500 shares selling at 291/2c, and Opex was further in the dumps with sales of 4,300 shares at 48c to 50c.

# **NEW CHANCES FOR COALITION TUNNEL**

Crossing on Way to

Mother Lode.

Before working of driving the Silver Island Coalition Mines company's new tunnel was finally begun the site was changed to a lower level than it was heavy loads.

The from Deeth March 1 to work on the bad end of the road into years of the lease for one month, it is said, and if the intention to ship two carloads a month is carried out, the lessees will be suitably rewarded for the perseverance which they have displayed in opening a producer.

Recent development work in the claim March, A. D. 1910.

MARGARET ZANE WITCHER, (Seal)

Clerk. changed to a lower level than it was originally intended to pursue. The change was made on account of the discovery having been made by Superintendent Morrison that the juncture of two strong veins might be cut on the mother lode. The veins known as the Le Roy vein and the east vein were traced for something like three-

100 feet south of the course of the tun- place it in passable condition, nel, and in close association with that

The market generally was inclined to heaviness throughout the week. Colorado declined all that it was entitled to upon becoming ex-dividend, and neither Iron Blossom nor Sloux Consolidated was particularly strong. Lower Mammoth and Uncle Sam displayed some new animation, New York Bonanza gained slightly, and Silver King Coalition was weak and lower on account of passing its dividend.

The market generally was inclined to have to have the most shallow depth has been taken out and shipped \$18,000 of high grade ores. The new tunnel will catch the crossing of the Le Roy and east velns about 200 feet from its portal and at a depth of about 200 feet.

About 700 feet of driving will be required to reach the mother lode, which and lower on account of passing its dividend. About 700 feet of driving will be required to reach the mother lode, which at the surface is thirty feet and forty nish the following, received over their private wire:

feet wide. It is strongly mineralized and, with the many fissures connect ng with it, there can be no doubt that mportaant ore bodies will be found. The tunnel will cut the big lode at 800

# **BECOMES SHIPPER**

Owners Employ Increased Force to Take Out Highgrade Rock.

Expecting to take out two and three carloads a month of ore which is said to average about \$150 a ton in gold, silver and copper, W. J. Wostenholme and son have gone to Marysvale to start active work in the Shamrock property with a force of eight or ten men. A tria shipment of the ore, which was market ed in this city the middle of the week gave satisfactory returns. The ore is taken from a tunnel which is being driven on the vein, and the owners are confident that they have only to con-tinue to follow the pay material to open

The original discovery in the Shamrock mine was made March 17, one year ago. When it became known yesterday that the first carload of ore from the mine was sold to the smelter on March 17, some of those who give heed to coincidences wondered if the luck of the Shamrock were not in some way associated with the spirit of Ireland's patron

### TELLING DEVELOPMENT IN EAST TINTIC MINE

Eureka, March 19.-Two carloads of nice lead-silver ore, which are expected to net the company about \$1,400, were shipped during the week from the East Tintic Development mine. Four car-loads of ore have already been taken out through the winze which was sunk from the 260-foot level, and at this time a raise is being pushed up for the pur-1.50 pose of capping that ore from the 300 level. When this connection is made the ore can be handled more rapidly and at less cost. In sinking the shaft a at less cost. In sinking the shaft a stringer of good ore was encountered at a depth of 450 feet, and at this time Manager Kellogg is driving a drift upon this ore which carries values of 53 per cent lead and about 58 ounces silver The stringer is not large, but owing to the high values in silver and lead the ore taken out is more than paying the expenses of running the drift.

#### EAGLE & BLUE BELL IN BEST ORE BODY ON 1.200

The ore body recently opened in the 1,200-foot level of the Eagle & Blue Bell mine is unquestionably the largest ore body ever encountered in that mine, according to a statement given the Eureka Reporter by Superintendent William Owers. The body is more than six feet across he says and the drift has Iron Blossom, 800 at \$2c; 100 at 35c, 100 at \$40.

Lower Mammoth, 100 at 52c, seller 60 days; 700 at 51c; 500 at 51c, seller 60 days; 700 at 51c; 500 at 51c, seller 60 days; 700 at 50c, seller 60 days; 300 at 9½c.

Prince Consolidated, 200 at 9½c.

Seven Troughs, 1,000 at 9½c.

Silver King, 50 at \$2.30.

Tintic Central, 7,000 at 6¼a.

Uncle Sam, 700 at 40c.

Sloux Consolidated, 200 at 39c.

Shares sold, 24,365.

Selling value, \$11,506.05.

Weeks sales, 350,002 shares, for \$131,754.

Iiam Owers. The body is more than six feet across, he says, and the drift has cut through it a distance of seventy-nine feet without going beyond the ore; it appears, in fact, to be getting stronger with every round of shots. The ore contains exceptionally high values. New machinery and timbers for 1,200 feet of shaft have been ordered, it is said, and it is expected that sinking of the shaft will be started at once.

### MODENA POWER PLANT SOON TO BE COMPLETE

A. S. Martin of the Gold Springs Mining & Power company has returned from the east, where he has been for some time in the interests of his company. Machinery for the power plant at Modena is all on the ground, Mr. Martin says, and it is being installed as rapidly as possible by the Richmond people. The transmission line to Gold Springs camp has been constructed and motors are being installed at the Jennie Davis Daly motors are being installed at the Jennie mine to take the place of gasoline engines. The power plant should be ready by the last of April to go into commission.

PROBATE AND GUARDIANSHIP

(Consult county clerk or the respec-tive signers for further information.) IN THE DISTRICT COURT, PRO-bate division, in and for Salt Lake coun-ty, State of Utah. In the matter of the estate of Ernest Anderberg, deceased.— The petition of H. M. H. Lund, admin-

Has Shortest and Best Route to Jarbidge, Says Salt Lake meridian, in the shortest and best route to the new gold camp, Jarbidge, is V. A. Bettilyon of this city, who has just returned from Deeth. An outfit of men and teams was sent from Deeth March 1 to work on the bad end of the road into Jarbidge, and, with the trail placed in condition, it is claimed the route from Deeth is forty miles shorter than any

Ingebretsen & Nibley, Attorneys for Pe-

IN THE DISTRICT COURT, PRO-bate division, in and for Salt Lake county, state of Utah. In the matter of the es-tate of Thomas Bishop, deceased.—Noopened in the lower levels of the prop-erty will enable them to make regular

shipments from the mine every two weeks.

Seven men have been employed on the lease during the last five months, and it was necessary to do a large amount of dead work that the ore might be handled to advantage. The shaft was retimbered for a distance of 100 feet, and numerous other improvements put into effect have reduced to a minimum the expense of handling the ore from the shaft.

JARBIDGE PIONEER IS

ALREADY IN WEALTH

Peter Thouret, one of the original owners of the Arizona group of claims, in Jarbidge district, is in the city for a few days. He is an old-time mining man and prospector, and he is confident that large bodies of good milling ore will be opened in Jarbidge. A big ledge of low-grade ore has already been proven in the Arizona. Mr. Thourott

Attorneys for Petitioner.

Lamar, Nev. Assay returns have been received, it is said, showing values as high as \$54,000 a ton, while ore running \$3,000 and \$4,000 a ton is in evidence in considerable quantities. The discovery has led to the belief that the old-time performances of the camp, when ore was shipped overland to Salt Lake at a good profit, are likely to be repeated.

GLASGOW GETS RESULTS

New Mill at Cherry Creek Said to Be Success.

Ely, March 19.—On March 1 the General Engineering company turned over to the Glasgow & Western Exploration company the new milling plant on the property in Cherry creek, and reports from the scene of action are authority for the conclusion that everything is operating without a hitch. It is said that an ideal gold and silver concent.

operating without a hitch. It is said that an ideal gold and silver concenfor petitioner.

trate is being made, the ore treated averaging twenty ounces silver and \$4 gold per ton. The mill is treating seventy-The petition of Stanley James Ongley, praying for the issuance to himself of letters of administration in the estate of George Samuel Ongley, deceased, has been set for hearing on Friday, the 1st day of April, A. D. 1910, at 2 o'clock p. m., The plant is a combination mill, the tailings from the tables being cyanided. One interesting feature of the plant is the Gritz cloth used on the Callow screens instead of the old-time wire creens, and this innovation is reported

at the county court house, in the court room of said court, in Salt Lake City, Salt Lake county, Utah.
